Visit trustfertility.com or call 877.652.9376 to learn more and start tailoring your trust today.

FERTILITY PRESERVATION TRUST

ASHLEY W. PITTMAN, PLLC

A trust can provide greater flexibility, added protection, and longer storage options while limiting court involvement and increasing privacy. As life changes, so do your wishes. As your wishes change, so can your trust.

Long Term Storage for Frozen Embryos

A trust which is specifically tailored to your wishes can limit the possibility of future disputes among family members as well as limit the possibility that a court, rather than you, will decide the fate of your embryos. The Fertility Preservation Trust can clearly set forth your choices for generations in the future.

Voluntary Preservation of Eggs and Sperm

You decided to preserve your eggs or sperm for future use. We can help you consider your options regarding duration of storage, restrictions on use, and disposition of unused eggs and sperm after a designated period of time has elapsed or upon the occurrence of a certain event.

Oncology Patients

We understand that oncology patients are faced with difficult decisions following a cancer diagnosis. The Fertility Preservation Trust can assist you with identifying and clearly defining your decisions regarding the future maintenance, use, and disposition of your reproductive material. This provides peace of mind to you and your loved ones.
